

MISCARRIAGE OF JUSTICE:

Our court system is designed to be a place where honesty and truth is the primary force for justice. Due to ineffective counsel, denial of due process, and malicious prosecution within the court system, I've been branded a criminal and denied my innocence. Over the past 16 years I've exhausted all my financial resources totaling \$45,000 in legal fees. The primary losses are those affecting my overall quality of life. These losses include my security company, my constitutional rights, and most damaging of all, defamation of my character. This is a "slam dunk case of guilty until proven innocent," where "built-in malice and malicious use of process" has caused significant deterioration of my life.

All facts can be proven true with compelling evidence such as court documents, motions, police reports, sworn affidavits, memorandums, and court hearing transcripts. Thank you for taking the time to view my website.
